CURRENT SITUATION

Current Situation:	<p>Fresno County: Several Evacuation Orders in the Creek Fire South Zone were downgraded today by the Fresno County Sheriff's Department. Multiple Evacuation Orders throughout the fire area remain in place. Please see the interactive map below for information for both Madera and Fresno County evacuation conditions. Even with today's reduction it is estimated that over 10,000 residents remain evacuated.</p> <p>Warm and dry conditions are contributing to active fire behavior 24 hours a day. The most active area today was the northeast portion of the fire, burning toward the Ansel Adams Wilderness. Spread is predicted to slow as this portion of the fire burns into rocky terrain. On the opposite side of the fire, in the Jose Basin the fire pushed through established perimeter lines this morning, threatening several structures. Point protection tactics were initiated and no structures were destroyed by the run of fire. After a 180 degree shift in wind direction firefighters were able to construct control line around the slop over. Though the threat is still very real to the communities in the fire area there was no significant fire activity near them today. The primary mitigation activity was patrol and mop up of hot spots in most developed areas.</p>
---------------------------	--

	<p>The fire is expected to burn actively over the next few nights as relative humidity drops into the single digits.</p> <p>Madera County: A number of Evacuation Warnings were lifted in Madera County. This included the area of John West, Upper 426 road and China Creek. The interactive map below shows all current evacuation zones and their status.</p> <p>Smoke was heavy in the drainages this morning, but began to clear in the afternoon. More sun on the fire brought more fire activity. The fire is progressing primarily to the north and northeast towards McCurry Trailhead, Jackass Meadow, Portuguese View Point, Globe Rock, and Little Shuteye Peak.</p> <p>Tonight the fire will remain active. Fire will progress primarily to the north and northeast Fire will also continue moving towards Central Camp, South Fork Bluffs and Whiskey Falls.</p> <p>Temperatures will warm Tuesday and Wednesday primarily due to more sun as the smoke inversion weakens. A break in the inversion is possible Wednesday and likely on Thursday as winds aloft increase from the southwest.</p>
