	Mixed Commercial/Residential Destroyed: 8		Mixed Commercial/Residential Damaged: 0
Total Destroyed: 1,113			
Total Damaged: 74			

CURRENT SITUATION

Current Situation

Dixie Fire West Zone The smoke layer over the fire kept activity moderate through the first part of the day. High pressure brought widespread warm and dry conditions over the fire area. Isolated thunderstorms and strong winds occurred this evening with some rain. Fiber optic cable damage is still causing intermittent issues using 911 within Lassen County and surrounding areas. Safety is a priority as firefighters will continue to secure and construct containment lines and provide structure protection. Evacuation Warnings and Evacuation Orders could change every day, please see below for information affecting your area. California historically experiences some of the most devastating wildfires. Do Not Let Your Guard Down! To learn how to prevent sparking a wildfire visit www.readyforwildfire.org.

	<p>Dixie Fire East Zone: As predicted, thunderstorm cells moved into the area and the outflow of air created erratic winds and strong gusts. In combination with high temperatures and clear skies, the fire was very active at Keddie Point, Dyer Mountain, and pushed South and East at Wilcox Valley. Air support consisted of fixed wing aircraft in Wilcox Valley and rotary around Dyer Mountain. Unstable atmospheric conditions are anticipated to remain overnight.</p>
