INCIDENT FACTS

Incident Start Date: 7/13/2021		Incident Start Time: 5:15 p.m.	
Incident Type: Vegetation		Cause: Under Investigation	
Incident Location: Feather River Canyon near Cresta Powerhouse			
CAL FIRE Unit: Butte, Lassen-Modoc, Tehama			
Unified Command Agencies: CAL FIRE, United States Forest Service, National Park Service			
Size: 724,110 acres	Containment: 38%	Expected Full Containment: TBD	
First Responder Fatalities: 0		First Responder Injuries: 3	
Civilian Fatalities: 0		Civilian Injuries: 0	
Structures Threatened: 12,471	Single Residences Destroyed: 678		Single Residences Damaged: 52
	Multiple Residences Destroyed: 8		Multiple Residences Damaged: 4
	Non-residential Commercial Destroyed: 137		Non-residential Commercial Damaged: 10
	Other Minor Structures Destroyed: 428		Other Minor Structures Damaged: 25
Total Destroyed: 1,259	Mixed Commercial/Residential Destroyed: 8		Mixed Commercial/Residential Damaged: 0
Total Damaged: 91			

CURRENT SITUATION

Current Situation

Dixie Fire West Zone: The fire remained active, though smoke did limit activity in some areas. A much quieter weather pattern is shaping up for most of this week. Potential still exists for plume-dominated fire behavior with fuel-alignment, topography, and extremely dry fuels. Crews continue mopping-up hot spots, and are working to strengthen control lines. Damage assessment is ongoing, and the number of damaged and destroyed structures may change as teams are able to access the fire area safely. Northern California has experienced large fire activity and will likely experience an extended fire season. Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. The prioritization of resources is always based on life, property, and natural resources. Under these drought conditions, wildfires are burning rapidly with extreme severity and have traveled up to 8 miles in a single day. Fuel conditions are much worse than previous years and along with wind is causing much greater fire spread. Firefighters are experiencing conditions never seen before, such as increased spread rates, spotting and active nighttime burning. We coordinate very closely

	<p>with the US Forest Service and CalOES for our local and out of state partners, to ensure resource availability.</p> <p>Dixie Fire East Zone: The eastern edge of the fire line towards Janesville remains secure. Crews are on the ground mopping up hot spots around the structures in Milford - there are currently no reported losses. Crews continue to construct direct lines at the top of the escarpment. On the southern edge above Antelope Lake, resources continue to go direct along the fire's edge to tie it into the Lake. On the western edge, they have completed and secured the dozer lines and are securing the line and extinguishing heat along the way. In Genesee Valley, resources continue to mop up around structures. Firefighters are intercepting the fire as it has made it was down to the road. Resources are engaged in a slop over in the northern section of Genesee Valley. They are attempting to get line around it as crews continue putting in direct and indirect line to cut off any additional eastern spread. In Taylorsville/Peters Creek, firefighters are going direct on the fires edge, mopping up and patrolling around all the structures. A contingency line above Taylorsville is being constructed. Beckworth Hotshot crew was able to complete handline down the eastern side of the Grizzly Spot. Air support was lost due to poor visibility. Crews will continue to work the western edge tomorrow.</p>
