INCIDENT FACTS

Incident Start Date: 7/13/2021		Incident Start Time: 5:15 p.m.	
Incident Type: Vegetation		Cause: Under Investigation	
Incident Location: Feather River Canyon near Cresta Powerhouse			
CAL FIRE Unit: Butte, Lassen-Modoc, Tehama			
Unified Command Agencies: CAL FIRE, United States Forest Service, National Park Service			
Size: 727,896 acres	Containment: 40%	Expected Full Containment: TBD	
First Responder Fatalities: 0		First Responder Injuries: 3	
Civilian Fatalities: 0		Civilian Injuries: 0	
Structures Threatened: 11,971	Single Residences Destroyed: 679		Single Residences Damaged: 52
	Multiple Residences Destroyed: 8		Multiple Residences Damaged: 4
	Non-residential Commercial Destroyed: 139		Non-residential Commercial Damaged: 10
	Other Minor Structures Destroyed: 428		Other Minor Structures Damaged: 25
Total Destroyed: 1,262	Mixed Commercial/Residential Destroyed: 8		Mixed Commercial/Residential Damaged: 0
Total Damaged: 91			

CURRENT SITUATION

Current Situation

Dixie Fire West Zone: Quieter weather patterns are still anticipated for most of this week though gusty local winds in areas of the fire continue to persist. Crews continue mopping-up hot spots and strengthening control lines. Damage assessment is ongoing and as teams are able to access the fire area safely, the number of damaged and destroyed structures may change. Certain evacuation orders have been reduced to warnings and certain warnings have been lifted allowing some residents to return to their homes and businesses. Returning residents are strongly encouraged to stay vigilant with regard to current fire conditions. Residents may see smoke coming from trees and stumps for days following their return. Residents are encouraged to call 911 if they are concerned about any active flames near their homes or businesses rather than attempting to deal with such flames themselves.

Northern California has experienced large fire activity and will likely experience an extended fire season. Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. The prioritization of resources is always based on life, property, and natural resources. Under these drought conditions,

	<p>wildfires are burning rapidly with extreme severity and have traveled up to 8 miles in a single day. Fuel conditions are much worse than previous years and along with wind is causing much greater fire spread. Firefighters are experiencing conditions never seen before, such as increased spread rates, spotting and active nighttime burning. We coordinate very closely with the US Forest Service and CalOES for our local and out of state partners, to ensure resource availability.</p> <p>Dixie Fire East Zone: The eastern edge of the fire line towards the Janesville and Milford have remained secure. On the southern edge above Antelope Lake, resources continue to work the fire's edge with dozers and handlines to tie it into the lake. Today, crews from the west zone supplemented firefighters from the Milford and Janesville area fire so they could relocate to the south end of Genesee Valley to surge resources in critical areas. In Genesee Valley, the fire is burning aggressively downhill, and firefighters continue to engage the fire as it makes its way down to the road where they continue to catch any spots or slops while securing it at the road. The spot below the Grizzly Peak continues to burn up the hill towards the main spot. The spot is now estimated at 560 acres. Work continues on the contingency line in the event of the spot burning south. Today crews worked to minimize any spread moving towards homes. Firefighters continue putting in direct and indirect line to tie the fire into the Genesee Road and the Walker Fire Scar. In Taylorsville/Peters Creek, firefighters are going direct on the fires edge, mopping up and patrolling around all the structures. A contingency line above Taylorsville is being constructed, and drones will be flying tonight, if conditions allow, to add depth and reduce the fire behavior as it comes down the hill. The full contingent of aircraft continues to make drops as visibility allows. Contingency lines are being put in place to the south of Grizzly Ridge.</p>
