INCIDENT FACTS

Incident Start Date: 7/13/2021		Incident Start Time: 5:15 p.m.	
Incident Type: Vegetation		Cause: Under Investigation	
Incident Location: Feather River Canyon near Cresta Powerhouse			
CAL FIRE Unit: Butte, Lassen-Modoc, Tehama			
Unified Command Agencies: CAL FIRE, United States Forest Service, National Park Service			
Size: 747,091 acres	Containment: 45%	Expected Full Containment: TBD	
First Responder Fatalities: 0		First Responder Injuries: 3	
Civilian Fatalities: 0		Civilian Injuries: 0	
Structures Threatened: 11,813	Single Residences Destroyed: 682		Single Residences Damaged: 52
	Multiple Residences Destroyed: 8		Multiple Residences Damaged: 4
	Non-residential Commercial Destroyed: 139		Non-residential Commercial Damaged: 10
	Other Minor Structures Destroyed: 436		Other Minor Structures Damaged: 26
Total Destroyed: 1,273	Mixed Commercial/Residential Destroyed: 8		Mixed Commercial/Residential Damaged: 0
Total Damaged: 92			

CURRENT SITUATION

<p>Current Situation</p>	<p>Dixie Fire West Zone: Winds calmed after sunset but the fire remained active well into the night. Spotting and torching was limited to areas in and around Lassen Park with fire burning in a number of remote areas with limited access and steep and rugged terrain. Temperatures today are expected to increase with decreasing winds from the north and northwest.</p> <p>Certain evacuation orders have been reduced to warnings and certain warnings have been lifted allowing some residents to return to their homes and businesses. Returning residents are strongly encouraged to stay vigilant with regard to current fire conditions. Residents may see smoke coming from trees and stumps for days following their return. Residents are encouraged to call 911 if they are concerned about any active flames near their homes or businesses rather than attempting to deal with such flames themselves.</p> <p>Northern California has experienced large fire activity and will likely experience an extended fire season. Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. The prioritization of resources is always</p>
---------------------------------	---

Bill See

	<p>based on life, property, and natural resources. Under these drought conditions, wildfires are burning rapidly with extreme severity and have traveled up to 8 miles in a single day. Fuel conditions are much worse than previous years and along with wind is causing much greater fire spread. Firefighters are experiencing conditions never seen before, such as increased spread rates, spotting and active nighttime burning. We coordinate very closely with the US Forest Service and CalOES for our local and out of state partners, to ensure resource availability.</p> <p>Dixie Fire East Zone: Overnight hotshot crews continued to work the fire down off Mt. Jura to the valley bottom to secure Taylorsville. They continue to aggressively mop up heavy materials to reduce spotting. No spots have occurred. Today resources will focus on holding this line. Resources were actively engaged in structure protection in the Genesee Valley near Ward Creek and Little Grizzly Creek as the Peel Ridge spot backed down into the valley and will continue this work today. Structure preparation were completed in the Five Bears/Ward Creek area. Hand crews and aircraft worked the western edge of the Grizzly spot and kept it from moving west, but it continues to flank mostly in the eastern direction. Significant progress was made on the contingency lines down Grizzly Ridge to the southeast to protect communities south such as Greenhorn and Quincy. Additional work was also carried out in Peters Creek to remove a pocket of unburned fuel to secure the line north of Taylorsville. Crews patrolled and moped-up all through Indian Valley. In the Dyer Mountain area crews continue to work at removing the concentration of heat near the line in Second Water Trough Creek. Heavy equipment and crews are working to secure the spot fire near Antelope Lake.</p>
