| Total Damaged: 92 | | | |

CURRENT SITUATION

Current Situation

Dixie Fire West Zone: Light winds along with the start of a warming trend are expected on Friday. Temperatures are forecasted to be above normal through the weekend with poor overnight recoveries and possible single digit RH values. An increase in fire behavior is anticipated with this forecasted hot and dry weather.

Community Meeting – Old Station, CA
When: Saturday, August 28, at 3:00 P.M.
Where: Shasta County Fire Department - Station 12
3385 CA-89 Old Station, CA 96071

Certain evacuation orders have been reduced to warnings and certain warnings have been lifted allowing some residents to return to their homes and businesses. Returning residents are strongly encouraged to stay vigilant with regard to current fire conditions. Residents may see smoke coming from trees

| | |
|---|--|
| | <p>and stumps for days following their return. Residents are encouraged to call 911 if they are concerned about any active flames near their homes or businesses rather than attempting to deal with such flames themselves.</p> <p>Northern California has experienced large fire activity and will likely experience an extended fire season. Fires burning in northern California are exhibiting extreme fire growth based on critical fuel conditions. The prioritization of resources is always based on life, property, and natural resources. Under these drought conditions, wildfires are burning rapidly with extreme severity and have traveled up to 8 miles in a single day. Fuel conditions are much worse than previous years and along with wind is causing much greater fire spread. Firefighters are experiencing conditions never seen before, such as increased spread rates, spotting and active nighttime burning. We coordinate very closely with the US Forest Service and CalOES for our local and out of state partners, to ensure resource availability.</p> <p>Dixie Fire East Zone: The fire by Janesville and Millford has seen not a change in its footprint, although smoke continues to be seen, it is well interior. There was also progress made on the areas in the vicinity of Antelope Lake. Along Genesee Valley Rd crews continue to find and extinguish spot fires from the Grizzly spot. The Grizzly spot fire reached the top of Grizzly Ridge and firefighters are working down the ridge with it to the south, burning as necessary to keep it from moving to the west. This will continue today. Multiple contingency lines have been constructed between Grizzly Ridge and Quincy and Greenhorn. The spot continues moving west, but lines continue to be constructed and improved to protect Taylorsville. Aircraft will continue to work at slowing its movement using both water and retardant as air quality allows. Equipment is also working north of Davis Lake on contingency lines. The fire backing down Mt. Jura to the east of Taylorsville has reached the bottom of the valley, the lines have held, and crews will continue mopping up today. Around Dyer Mt work continues to mop up heat. There has been no movement along the fruit growers Blvd. Out towards Storrie tactical mop up continues.</p> |
