INCIDENT FACTS

Incident Start Date: 7/13/2021		Incident Start Time: 5:15 p.m.	
Incident Type: Vegetation		Cause: Under Investigation	
Incident Location: Feather River Canyon near Cresta Powerhouse			
Size: 181,289 acres	Containment: 19%	Expected Full Containment: Unknown	
Civilian Injuries/Fatalities: 0		Firefighter Injuries/Fatalities: 0	
Structures Threatened: 7,010	Structures Destroyed: 10 Other Minor Structures: 6	Structures Damaged: 10	

CURRENT SITUATION

Incident Update

Dixie Fire West Zone – Hot and dry conditions will continue today, and minimum relative humidity's will drop into the upper single digits with little to no recovery. Firefighters from the ground and the air continue to aggressively fight the Dixie Fire. The fire continues to burn in a remote area with limited access, and extended travel times with steep terrain are hampering control efforts. A second incident base, in Westwood, has been established to support logistical needs of the fire. The fire is expected to remain active at night along ridge tops and in canyon bottoms that align with the down canyon winds. The Dixie Fire remains in Unified Command, with two teams overseeing the fire: CAL FIRE Incident Management Team 1 on the West Zone and California Interagency Incident Command Team 2 on the East Zone.

Dixie Fire East Zone – The fire line in the southern section of the Dixie Fire east zone has been successfully tied into the west end of Bucks Lake. Fire crews will now begin to build indirect line to the north to tie in the southeast portion of the fire. The eastern portion of the fire grew significantly, primarily in the area north of Hwy 70 near the community of Twain. Fire crews and equipment are positioned to protect properties in Twain as the fire grows to the northeast. The Fly Fire reached nearly 2,800 acres and is expected to reach the peak of Mount Hough in the next 24 hours. Fire managers are assessing the structure protection needs of communities to the northeast of both the Fly and Dixie Fires.
